

Religious, Spiritual & Faith Community Services

Coordinate faith-community facilities, spiritual care, volunteers, accommodations, services, resources and interfaith disaster work.

Why this matters

Faith communities often provide sheltering support, feeding, donations, emotional and spiritual care, facilities, volunteers, recovery services and trusted community relationships. Those capabilities need coordination without losing privacy, doctrine or organizational autonomy.

Designed for

Faith communities, spiritual-care teams, interfaith coalitions, VOAD partners, chaplaincy programs, community-service ministries and emergency-management liaisons.

What users can do

- Map organizations, facilities, services, capabilities and coverage.
- Schedule interfaith coordination, training, exercises and preparedness work.
- Track requests, decisions, handoffs and resource support through completion.
- Use faith-aware guidance while protecting privacy and organizational authority.

Current connected operating layer

Connected capability	Recovery 35.6 operating layer
Operational Assurance	Universal Needs Attention queue plus Executive / Command Brief from permission-visible records.
Decisions, Handoffs & Meetings	Structured decision logs, acknowledged shift/position handoffs, and meeting actions that persist until closed.
Resource Lifecycle & Readiness	Resource requests from request through closeout, plus credential/qualification evidence and readiness warnings.
Plan-to-Operation & Schedule	Activate approved plans into trackable actions; schedule routine, preparedness, training, exercise, recovery and incident meetings.
GIS/COP, Live Intelligence & ICS	Map-first COP, source-aware intelligence, position workspaces, standardized forms and automated incident documentation.
Instructions, Training & Sandbox	Affected guidance, training and practice paths are synchronized with the current build and support controlled user learning.

Faith-aware guidance is operational support, not a substitute for organization-specific doctrine, pastoral judgment, privacy policy or legal requirements.
